

Fidelity® Variable Insurance Products VIP Growth Portfolio

Fidelity Investments & Pyramid Design is a registered service mark of FMR Corp.

Investment Objective: Seeks to achieve capital appreciation.

Investment Strategy: Normally investing primarily in common stocks. Fidelity Management & Research (FMR) normally invests the fund's assets primarily in common stocks of companies that FMR believes to have above-average growth potential (stocks of these companies are often called "growth" stocks). Growth may be measured by factors such as earnings or revenue. FMR may invest the fund's assets in securities of foreign issuers in addition to securities of domestic issuers.

Portfolio Manager: Jason Weiner joined Fidelity's equity research department in 1991, and subsequently followed the retail, technology, air transportation, business services, biotechnology, retail

office products, personal computers and computer workstation industries. He also manages Fidelity Advisor Equity Growth Fund and Fidelity Growth Discovery Fund.

Investing in securities of foreign companies and governments involves considerations and potential risks not typically associated with investments in domestic corporations and obligations issued by the U.S. government. Funds allocated in an international/global/emerging markets variable portfolio could be subject to risks associated with changes in currency values, economic, political and social conditions, the regulatory environment of the countries in which the portfolio invests, as well as the difficulties of receiving current and accurate information. The securities markets of many of the emerging markets in which the portfolio may invest are substantially smaller, less developed, less liquid and more volatile than the securities markets of the United States and other more developed countries.

Fidelity Investments and Ohio National are not affiliated. Fidelity Investments & Pyramid Design is a registered service mark of FMR Corp.

For registered products this information must be preceded or accompanied by prospectuses. Variable products are sold by prospectuses, which contain more complete information including fees, contingent deferred sales charges and other costs that may apply.

Contact your registered representative or visit <http://fundinfo.ohionational.com> to obtain current prospectuses. Please read the product and fund prospectuses carefully before you invest or send money. Investors should consider the investment objectives, strategies, risk factors, charges and expenses of the underlying variable portfolios carefully before investing. The fund prospectus contains this and other information about the underlying variable portfolios.

Variable products, and their underlying portfolios, are not insured or guaranteed by the FDIC or any other government agency, are not a deposit and are subject to risk, including loss of principal. Variable annuities are long-term investment vehicles designed for retirement purposes. Withdrawals from annuities are subject to applicable surrender charges, ordinary income tax, and if taken prior to age 59½, a 10 percent federal tax penalty may apply. Variable life insurance is an insurance product with investment features. It is most appropriate when there is a need for life insurance protection. If tax-free loans are taken, and the policy lapses, a taxable event may occur. Loans and withdrawals from life insurance policies that are classified as modified endowment contracts may be subject to tax at the time the loan or withdrawal is made. Loans and withdrawals reduce the death benefit, cash surrender value and any living benefit amount. Consult a qualified tax adviser regarding individual circumstances.

Variable annuities are sold by prospectuses.

Product availability varies by state.

Some portfolios contain different investments than similarly named retail funds offered by the portfolio manager. Investment results may be higher or lower.
